Hodor farm

Second generation of Gypsophilla growers

The Grower:
Ne'eman Hodor

Quality

Quality – Handling the flowers in the field

- No cutting flowers in the heat of the day
- Flowers are put straight into preservation solution
- Sorting by stem diameter, Length and flower size by a camera led sorting machine.

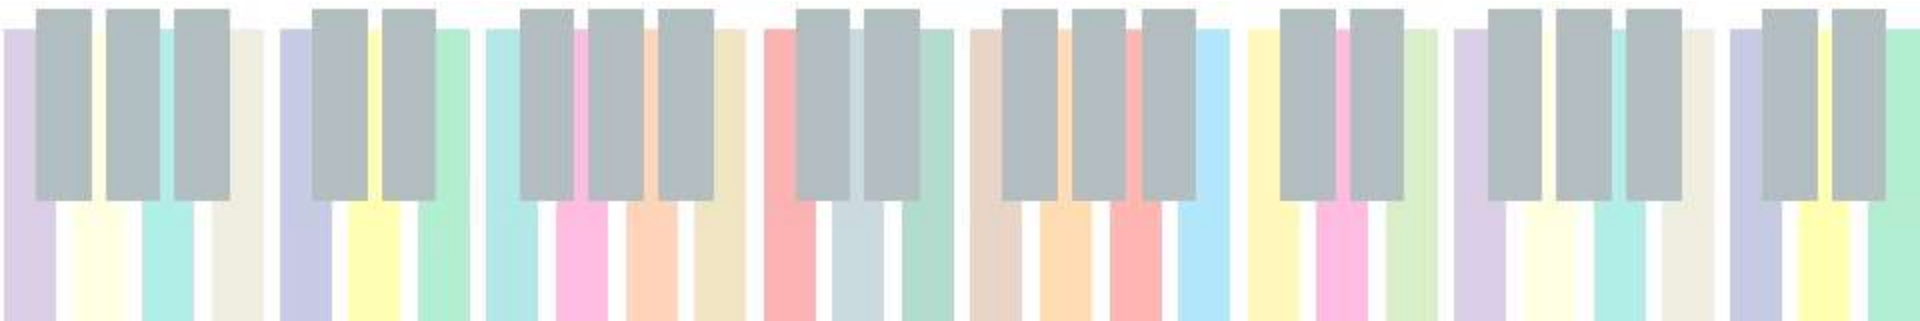

Technology serves Quality

- Top of the line sorting machine is camera operated.
- The camera sorts by:
 - Flower size.
 - Flower weight.
 - Flower length.

Handling the flower post harvest

- Using the latest post harvest protocol to ensure maximum vase life
- Controlled opening – In a temperature controlled room

Full flower
Strait stem
Florists friendly

Mirabella

Large flower
Bright white color
Strong stem
25 -60 gram

The farm employs 24 workers, both locals and foreign and following the guidelines of fair employment.

A photograph of a vast field of white Gypsophila flowers, also known as baby's breath, stretching towards the horizon. In the background, several large, colorful plastic pots in shades of blue and red are visible, suggesting a nursery or farm setting. The text is overlaid on the left side of the image.

Ne'eman's Advantage:

- Large farm with a large selection of Gypsophila varieties.
- State of the art opening facility
- Superb quality
- Can supply large quantities on short notice
